

Data sheet:**Stripping pliers manual
for solar cables up to 10 mm²**

The professional stripping pliers for PV cables from TOOLOVA have been specially developed for cable cross-sections from 2.5 to 10 mm² and enable precise, safe stripping of the cable ends. Thanks to the integrated cable cutter, the preparation of the cables is significantly accelerated and optimised, which simplifies the installation process in photovoltaic systems. The robust construction and ergonomic design guarantee a long service life and reliable performance in daily use.

**Specifications:**

Article No.:	92167
Material:	Steel pliers body
Weight:	369 g
Length:	163 mm
Design:	manual
Cable cross-section:	2,5 – 10,0 mm ²
Features:	Wire stripper, cutter
