

Stäubli assembly wrench set - PV-MS

Item no. 99000

The Stäubli PV-MS assembly tool is used for assembling, counter-holding and loosening plug connections of MC4 connectors. The plastic assembly wrench set consists of two assembly wrenches. One side of the assembly tool is used to release the locking mechanism, and the other side of the PV-MS MC4 wrench is used to tighten the cable gland. The area in the center of the tool wrench is suitable for counter-holding the connection. Recommended Stäubli assembly instructions for using the tool: MA231, MA260, MA275
